

CZECH REPUBLIC

Candidate for the ITU Council 2027 - 2030 (Region C)

SPRING, SUMMER, AUTUMN, WINTER

THE CZECH REPUBLIC WORKS IN ITU THROUGHOUT ALL 4 SEASONS

As an active, long-standing ITU member, the Czech Republic has consistently demonstrated its strong commitment to the ITU's core mission. We remain dedicated to advancing global objectives in telecommunications and digital development.

OUR MISSION: SHAPING A HUMAN-CENTRIC DIGITAL FUTURE

The Czech Republic firmly believes that the ITU is a vital multilateral platform to address the world's most pressing ICT challenges. We are convinced that the digital era must be shaped by the highest ethical and security standards, the protection of fundamental human rights and transparent, equitable and effective governance. In particular, the focus should be placed on:

- Universal and inclusive connectivity
- Cybersecurity that safeguards privacy, dignity, and freedoms
- Effective use of the radio spectrum and its management
- Broadband technology deployment
- Digital skills and lifelong learning for all generations
- Removing discriminatory barriers to ICT

We advocate for ethical governance of data and emerging technologies, ensuring that digital transformation upholds privacy, freedom of expression, and universal access to information. We aim to broaden the inclusion of industry and business leaders in ITU activities—especially in capacity building—to help close the digital divide and foster inclusive digital ecosystems.

WHAT THE CZECH REPUBLIC OFFERS

- A reputation for reliability, fairness and efficiency
- Active participating in all three ITU sectors and in the Council (chairing and vice-chairing various bodies across the Union)
- Active membership and collaboration within CEPT, the European Union and other international organisations
- Advanced, future-oriented digital and communication technologies
- A thriving start-up and spin-off environment
- Emphasis on innovation, digitalization and industrial research
- A stable economy with predictable regulation of the electronic communications market
- Extensive experience in transitioning to a liberalized, open-market economy with vibrant competition and strong protection for users and investors
- A committed partner ready to share our knowledge and expertise, continue meaningful capacity building projects and work tirelessly for the benefit of the ITU community
