Council Member of ITU**

**REPUBLIC OF  
KOREA**

Candidate for the ITU Council  
**2027-2030**

Ministry of Science and ICT

# REPUBLIC OF KOREA

70+ YEARS OF COMMITMENT

# ADVANCING TOGETHER TOWARD A DIGITAL FUTURE

## A Trusted and Committed Partner of ITU

Since joining the ITU in 1952, the Republic of Korea has maintained close and constructive engagement with the Union, consistently supporting its commitment to universal and meaningful connectivity and to ensuring that no one is left behind in the digital transformation.

Korea has served nine consecutive terms as a Member of the ITU Council, contributing responsibly to the institutional effectiveness of the Union and to the development of its strategic and policy directions. Korea has also provided substantive technical inputs and assumed leadership roles in key ITU bodies, actively engaging across all three Sectors of the Union.

## Responding to Global Challenges through Digital Transformation

Aligned with its national science and ICT policy priorities, Korea is pursuing a digital vision focused on strengthening connectivity, enhancing digital skills, and promoting the responsible and practical use of emerging technologies, including artificial intelligence (AI).

Having experienced both development challenges and rapid digital advancement in its national development journey, Korea is well positioned to facilitate enhanced dialogue, mutual understanding, and cooperation between developing and developed countries within the ITU in this era of profound digital transformation.

Seeking a 10<sup>th</sup> Term on the ITU Council

## Advancing a Digital Future for All

- 1 Sharing policy experience and best practices with Member States
- 2 Contributing to the ITU's technical and development activities
- 3 Translating global discussions into concrete and meaningful progress toward a digital future
