75% **Internet access in rural areas**
(GSMA, 2025)

MAJOR EVENTS HOSTED IN SENEGAL

Senegal regularly hosts international ITU meetings in Dakar (CSRIO, Africa Regional Forum, UAT Council).

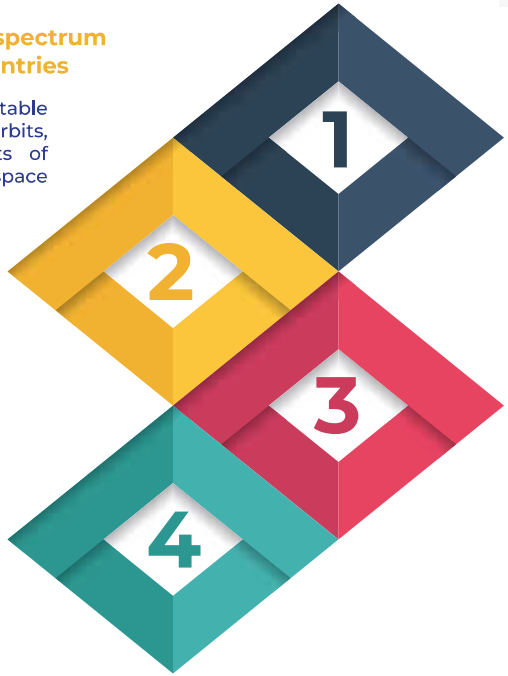
OUR COMMITMENTS
MANDATE 2027–2030

Senegal is implementing a digital vision rooted in sovereignty, inclusion and innovation (New Technological Deal 2034), guided by the Senegal 2050 framework. This strategy informs the commitments the country intends to present to the ITU Council for the 2027–2030 term.

NewDeal Technologique

Equitable access to spectrum and orbits for all countries

Senegal advocates equitable access to spectrum and orbits, and protects the rights of countries without space capabilities.



More resilient African infrastructure from the Atlantic

Building on its position as an Atlantic landing point, Senegal is working to strengthen the resilience of Africa's digital infrastructure.

AI that also speaks African languages

Senegal will ensure that developing countries participate upstream in the ITU's AI standardization work.

Stronger cybersecurity and children protected online

Senegal supports efforts to strengthen the ITU's assistance programs in a region facing increasing cybercrime attacks.

> ***We are at the dawn of a new era in which technology is profoundly affecting our societies and economies. Everywhere, digital technology is an essential lever for increasing competitiveness, asserting sovereignty and fostering prosperity.***

— ***H.E. Bassirou Diomaye Diakhar FAYE*** • *President of the Republic of Senegal*
