

Candidate for ITU Council
Region C 2023 - 2026

ROMANIA BRIDGE BETWEEN REGIONS

Romania - 156 years of ITU membership

Romania joined the ITU in 1866 and has significantly contributed to the ITU activities over the years. As a result, Romania's representatives often received the support of Member States for important functions in Plenipotentiary and World Conferences, as well as in ITU Study Groups and other meetings organised by the three Sectors of the Union - Radiocommunication, Standardisation and Development.

A key ITU partner and a bridge between regions

For seven consecutive terms, Romania has represented Region C in the ITU Council. This allowed our representatives to be actively involved in the elaboration of strategies for the global development of the ICT sector and to maintain a close collaboration with experts and specialists in the field.

Host country of PP-22

As a confirmation and recognition of the trust and visibility Romania enjoys within the ITU, during the 2019 Council session, Romania's candidature to host the ITU Plenipotentiary Conference 2022 (PP-22) was approved by the ITU Council Member States.

Member of ITU Council 2023 – 2026

As a member of the Council during 2023-2026, Romania is committed to continuing to be a reliable and open partner for all ITU members, while acting as an interconnector between all regions.

Romania will continue to support the objectives and ideals of the ITU and its Member States in a responsible manner, promoting sustainability, inclusiveness and gender-equality. Furthermore, as Council Member, Romania will always seek to support, take part in the negotiations and find compromise solutions on high-impact topics relevant for ITU members, in order to achieve positive results, in the interests of citizens all over the world and in line with the values and principles promoted by the United Nations system.
